Problem Statement:

In today's academic and professional environments, students are expected to showcase their skills, achievements, and academic progress in a structured and accessible format. Traditional methods such as printed resumes or static documents do not adequately reflect a student's diverse experiences, evolving skills, or creative work. Additionally, there is often no centralized system for students to collect, organize, and present their academic projects, certifications, extracurricular activities, and personal growth over time.

PROJECT OVERVIEW:

This project aims to develop a digital platform where students can create, manage, and showcase their academic and extracurricular achievements. The system will allow uploading of projects, certificates, and personal information in an organized format. It enhances students' ability to present their skills to educators and employers. The platform will be secure, user-friendly, and easily customizable.

WHO ARE THE END USERS?

End Users of the Student Portfolio System

Students - to create, update, and showcase their portfolios.

Teachers/Mentors - to review, give feedback, or endorse student work.

Recruiters/Employers - to view student portfolios during hiring or internship selection.

Academic Institutions - to track student progress and achievements over time.

Tools and Techniques:

HTML - to structure the portfolio content (projects, achievements, etc.)

CSS - to style the portfolio with layouts, colors, fonts, and responsiveness

JavaScript - to add interactivity (form validation, dynamic sections, image galleries, etc.)

LocalStorage / sessionStorage - to temporarily store user data within the browser

VS Code - as the code editor for development

Git + GitHub - for version control and hosting the project online
